Reflection 1

What practice and activities should be taken into account in determining the quality of someone's teaching?

The Teaching Standards Framework Structure

The Framework¹ provides a model for identifying criteria, indicators, sources of evidence for the development of standards.

For each **criterion**, the Framework provides indicators (elements of practice) and sources of evidence that can be used to demonstrate that an individual academic meets that criterion. This approach can help both proponents and committees organize their discussions and decision making more systematically.

Generally speaking, **indicators** are intended to be illustrative – instructors can demonstrate their effectiveness through different combinations of those indicators, using different types of **evidence**. Departments can make some indicators mandatory or optional. The research indicators also include disciplinary variations gathered from UWindsor promotion and tenure documents, which you may wish to consider.

Each criterion also requires **standards** – a minimum performance threshold for a given level of appointment. Typically these are descriptors, sometimes but not invariably including quantitative determinants (e.g. a minimum mean SET score for a given set of items). The intention is that standards should NOT rely solely on SET data, but should be assessed using a range of evidence. Some departments prefer to use a more rubric like approach indicating for example competent, good, and excellent levels of performance and then identifying performance standards for each stage of the RPT process.

¹ The Teaching Framework's criteria were developed through faculty collaboration at numerous Australian universities, across numerous disciplines (Chalmers, 2015) If you would like to see how other universities and instructors have used their versions of these materials, please visit <http://uniteachingcriteria.edu.au/framework/about/use/>

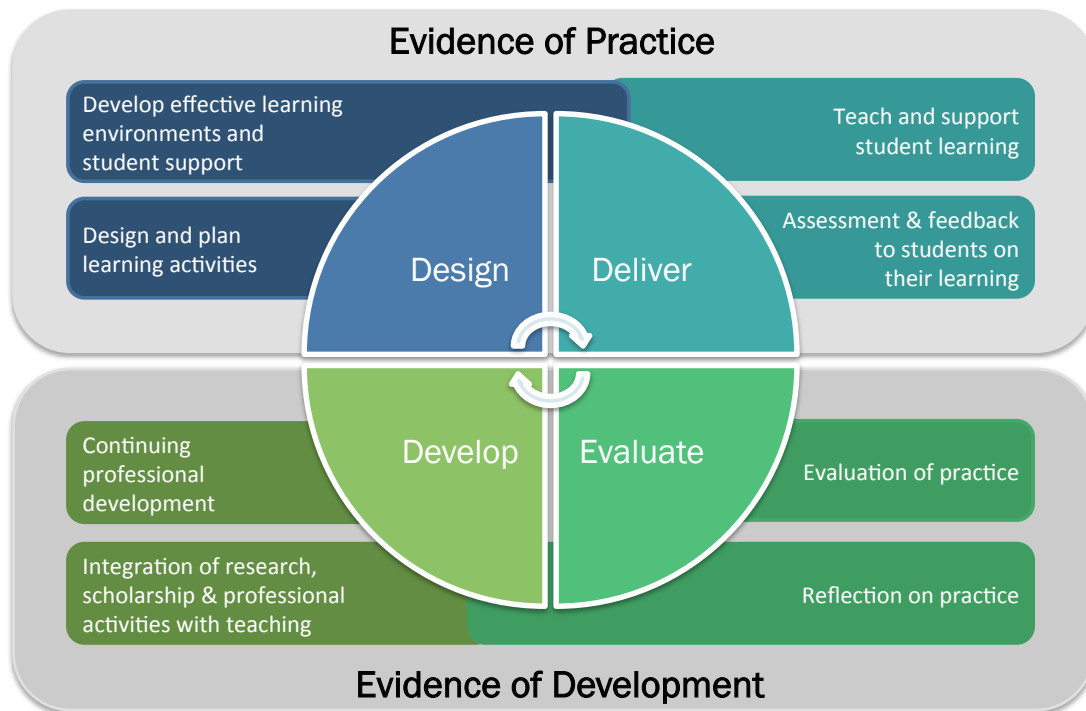

The University of Saskatchewan Draft Teaching Quality Framework Evaluation Framework

The University of Saskatchewan began a multi-year project in 2015 to develop a more comprehensive understanding of how teaching quality is conceptualized at our institution. Our intent was to assess alignment between our institutional policies and documentation describing teaching quality, teaching reward criteria and how teaching is evaluated at the University. Ultimately we wished to develop a teaching quality framework that would be a common point of reference for processes related to quality teaching across the institution. After completion of phase 1 of the project, a draft teaching quality framework was developed.

This framework is still in the development and consultation phase. The intent of the framework is to:

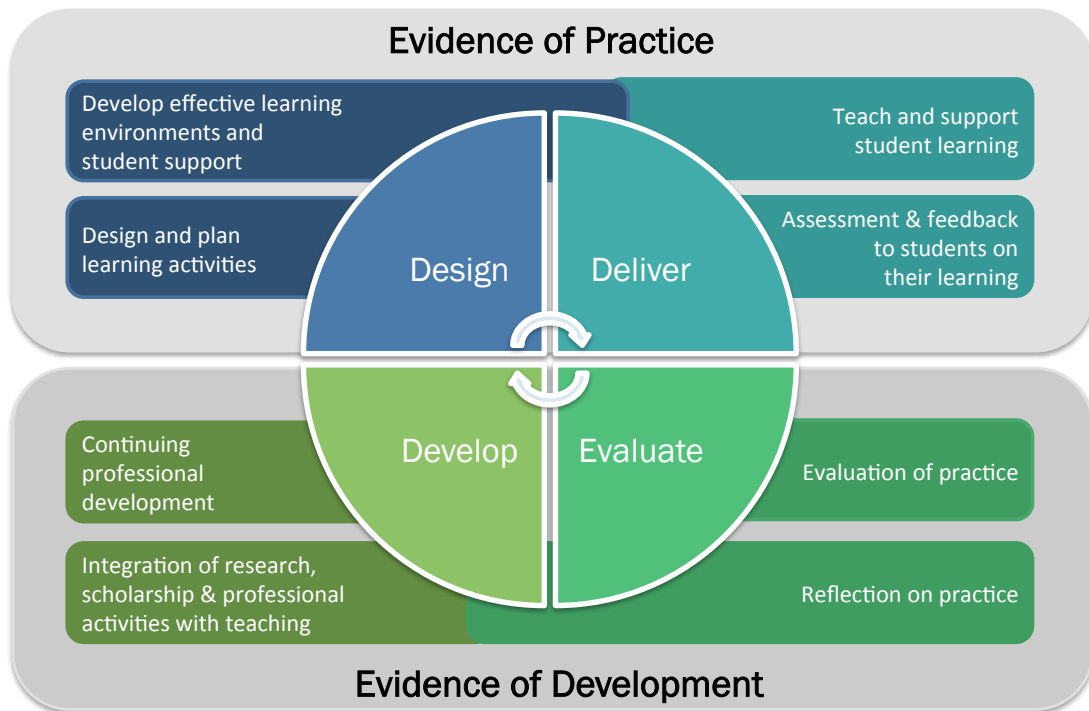

- ⇒ Facilitate an expanded shared conception of teaching practice and quality,
- ⇒ Facilitate an expansion of the sources of evidence we collect and consider appropriate evidence of teaching quality, including a balancing of evidence of practice with evidence of development,
- ⇒ Inform our selection of institutional tools that generate feedback on teaching quality (student evaluations, peer observation)
- ⇒ Clearly position teaching practice as (1) iterative (2) developmental, and (3) an intellectual endeavor
- ⇒ Enable meaningful and informed conversations about teaching quality, to support ongoing development of faculty, enhancement of teaching practices and curricula, and strengthen collegial processes,
- ⇒ Assist faculty in interpreting the University of Saskatchewan Standards for Promotion and Tenure, connecting them to their practice and supporting them in evidencing their achievement.

The framework is presented visually, showing how the varying criteria relate to teaching practice and to each other. Each criterion is then mapped to our institutional standards with a description of what that area of practice might look like (indicators) and what sources might be drawn on to evidence it. One example of this mapping is included on page 6.

Design	
Design and plan learning experiences (or systems of learning experiences)	
Standards:	<ul style="list-style-type: none"> • Mastery of subject area(s) or disciplines • Thorough preparation of classes • Organization of class/course, preparation for classes • Willingness to try different or new teaching methods and technologies • Incorporation of teaching innovations into teaching pedagogy • Teaching innovation in curricular design • Extent to which scholarly work is brought into the classroom
This might look like:	<p>Level 1:</p> <ul style="list-style-type: none"> • Alignment of quality learning outcomes, teaching strategies and assessment • Knowledge of the student learning process • Creation of learning resources to support student learning • Use of technology to support student learning • Content expertise <p>Level 2:</p> <ul style="list-style-type: none"> • Innovation in course design and/or use of technology to support student learning • Advanced knowledge of the student learning process in ones discipline <p>Level 3:</p> <ul style="list-style-type: none"> • Leadership of curricular design processes and/or program development
You might draw this type of evidence from:	<p>Annotated and peer reviewed:</p> <ul style="list-style-type: none"> • Syllabi • Assessments (essay questions, project briefings, exams) • Learning Resources (slides, quizzes, videos, handouts, activity sheets) <p>Peers</p> <ul style="list-style-type: none"> • Evidence of adoption of techniques/approaches by others • Recognition from university, national or international peers

Reflection 2

Map the list of teaching quality elements we generated at the beginning of the session to this Framework (p. 6).

- **What does the Framework miss?**

The University of Windsor Teaching Evaluation Framework

For each criterion, the Framework provides:

A definition, possible indicators, potential sources of evidence, and associated University Committee on Academic Promotion and Tenure (UCAPT) report categories.

Criterion 1: Design and planning of learning activities		
Planning, development and preparation of learning activities, learning resources and materials for a course, course or degree program; including coordination, involvement or leadership in curriculum design and development		
Possible Indicators	Sources of Evidence	UCAPT Categories
<ul style="list-style-type: none"> Preparation of course materials <ul style="list-style-type: none"> Planned learning activities designed to develop the students' learning Sound knowledge of the course content and material Course outline clearly details learning outcomes, teaching and 	<p>Possible Data sources from relevant sections in UWindsor Teaching Dossier template:</p> <ul style="list-style-type: none"> Course outlines (A2, <i>Teaching Practices</i>)³ Sample course material (A2, <i>Teaching Practices</i>, and appendices) Peer feedback (C, <i>Teaching Feedback</i>) Peer review of course materials by course/course coordinator (C, <i>Teaching Feedback</i>) Evidence of Adoption of teaching/curriculum materials by others (A4, <i>Teaching-Related Activities</i>, A5, <i>Teaching-Related Publications and Other Contributions</i>) <p>Possible data found in SET Questions:</p> <p>Course outlines</p> <p>B1. How effective was the requirement</p>	<p>Consistent with UCAPT categories:</p> <ul style="list-style-type: none"> A. Course outlines B. Organization of class C. Preparation for classes J. Appropriateness of material presented

The criteria are all revisable, removable, adaptable, and rework able, depending on your department's determination of what is important to decision making regarding the effectiveness and impact of instructors' teaching. These criteria have been suggested because they capture much of the range of effective teaching based on current understandings of effective pedagogy at Windsor, in Ontario, and internationally. In most cases, the proponent can determine what specific evidence to include in a submission package to make their case: however, departments may choose to make some forms of evidence mandatory.

The purpose of the criteria document is to make clear what the criteria are, what kinds of indicators reflect that someone would have met those criteria, and the kinds of evidence that can be used to demonstrate that indicators have been met.

Contextual Factors:

When reading the framework, it is worth keeping in mind that contextual factors are critical to a clear understanding of an instructor's practice and instructional profile. Instructors should be encouraged to include such a statement in their submissions. Possible factors to consider:

1. Teaching Assignment (Much of this can be found in section B1 of the University of Windsor Teaching Dossier template)

- How would I describe the organizational features of my teaching assignment to someone outside my AAU? Include for example: number of TAs, lab hours, training provided to assistants and/or sessional instructors etc.
- What courses have I developed or substantially revised – how many new courses over what period of time?
- Class sizes
- What levels of teaching am I engaged with?
- To what degree have the courses I've taught been within my areas of core expertise?
- How many departments am I teaching in?
- Mix of online/face-to-face; required/options; large/small enrolment
- Factors such as experiential learning
- Courses that are of an unusual nature in their programs

Group Activity 1

- 1. As an individual, review Criterion 2 (p. 22)**
 - Pick a disciplinary or departmental lens you are somewhat familiar with**
 - Read the criterion (including indicators etc.) from that lens. Identify adaptations and changes that improve the “fit” with that discipline**
- 2. As a group, discuss the changes you feel would be necessary and identify any common types of changes**

Criterion 2: Instructional methods

Quality teaching, including; lecturing, classroom, on-line, field, work-based, studio, laboratory, workshop, undergraduate and postgraduate teaching, and supervision of student research

Group Work 2: Implementing a Teaching Evaluation Framework

- How is this Framework approach different from what you're doing right now?
- How could this or something like it be used to advance your practice – as a tool for individuals, in a department, institutionally?
- What do you see as some of the challenges of using frameworks?
